

Ashleigh Huston, LPN

Ashleigh Huston, Covid-19 Community Liaison,

Contract position Until March 31, 2021 (with the possibility of extending)

My name is Ashleigh Huston and I am an Nlaka'pamux member from the Lower Nicola Indian Band. My mother is Barbara Huston and my father is Mitchell Shuter. I spent my youth growing up in the Nicola Valley and currently live there with my spouse and our two daughters.

I have a background in the medical field as both a Care Aide and an LPN. I graduated at NVIT from the care aide program in 2009 and then completed the LPN program in 2015. I have experience in a variety of settings including hospital, long term care and community all across Canada. My most recent experience being 2 years in community with our first nations people through Scw'exmx Community Health Services. My hope is to bring my medical knowledge into my role to help better assist our people as we learn more about living with the COVID-19 virus.

I am very excited to be working with the Nlaka'pamux Nation. My major role with NHSS will be to assist the nursing team during the vaccination roll out, COVID-19 testing, and directing community members affected by COVID-19 to access and utilize supports.
