

HOME VISITS

Home visits are a great beginning to positive communication and relationships between families.

- ◆ **The visits will be booked in advance upon clients' request, and can happen indoors, outdoors or, in some cases, in a single room.**
- ◆ **The designated visitor will be trained on using personal protective equipment, or PPE, to ensure the visit happens safely.**
- ◆ **Residents will be able to see our nursing team.**
- ◆ **Visitors will be screened for illness upon entry and must wear a mask.**
- ◆ **Establishing a strong foundation through home visits is only a first step—nurturing these relationships through consistent communication is critical to maintaining them.**
